

RECYCLING  
CONVEYORS

**VIBRATING CONVEYOR**

We adapt the materials used in the manufacture process of the vibrating conveyors, depending on factors such as the abrasion and particle size. Residing here our added value.

**RELIABILITY**

As a result of our experience and product knowledge we manufacture long-lasting conveyors.

**ADAPTABILITY**

We tailor-made each conveyor to adapt them to their work environment.

**ROBUSTNESS**

They comply with the high demands of the sector.

**NATURAL FREQUENCY**

It is a natural frequency vibrating conveyor..

**TRAY**

Made in carbon steel with an anti-wear coating on the bottom and sides.

**OSCILLATING MOTION**

Through a electric drive occurs the oscillating motion that generates the movement of material progress.

**HOOD**

We offer the possibility of manufacturing the conveyor completely closed, to prevent leakage of material and protect the working space.
