

RECYCLING  
CONVEYORS

CONVEYOR FOR PLASTICS

Cometel conveyors are designed and manufactured according to the specific needs presented by each customer.

We adapt the conveyor belt for the correct transport of different types of plastics.

Residing here our added value.

**RELIABILITY**

As a result of our experience and product knowledge we manufacture long-lasting conveyors.

**ADAPTABILITY**

We tailor-made each conveyor to adapt them to their work environment.

**ROBUSTNESS**

They comply with the high demands of the sector.

**TENSIONING SPRINGS**

These ensure the conveyor belt has the correct level of tension, which optimises performance and prolongs its useful life.

**DAMPERS**

Located on the sides of the conveyor, they slide easily in order to make maintenance work simpler.

**CONVEYOR BELT**

It will be composed by two lateral strips of chain, with flanges in all steps, where they will be screwed the tubular profiles.

**SAFETY SYSTEMS**

In order to protect the staff working at the plant and ensure the belt is working correctly, we install various safety devices which allow the system to be stopped both manually and automatically, and produce a warning signal so that the situation can be resolved.
