SORTING MACHINERY

TROMMEL

The rotary sieve or drum allows to treat a stream of material and to get a grading classification of the particles.

DRUM

It is perforated as a sieve, the holes are dimensioned according to the material to separate.

FRAME

Made of structural profiles.

COMPONENTS

All the components that will get in contact with waste are manufactured with abrasion resistant materials.

DAMPERS

To allow access to the inside of the drum area and perform maintenance works.

TECHNICAL FEATURES

MODEL	TROMMEL DIAMETER (mm)	SECTION NO (N°)	TROMMEL LENGHT	POWER	FLOW
CR-205-TRO	2000	8	5000/10000	2x7,5	35/75
CR-229-TRO	2000	8	5000/10000	2x15	40/90
