

METAL CHIPS  
SEPARATION EQUIPMENT

**MAGNETIC DRUMS**

Magnetic drums are used for the separation of ferromagnetic materials from other wastes. It's frame has scraper plates that brings material towards the area free of magnetic power, where the magnetic waste falls by gravity.

**FOCUSED TO**

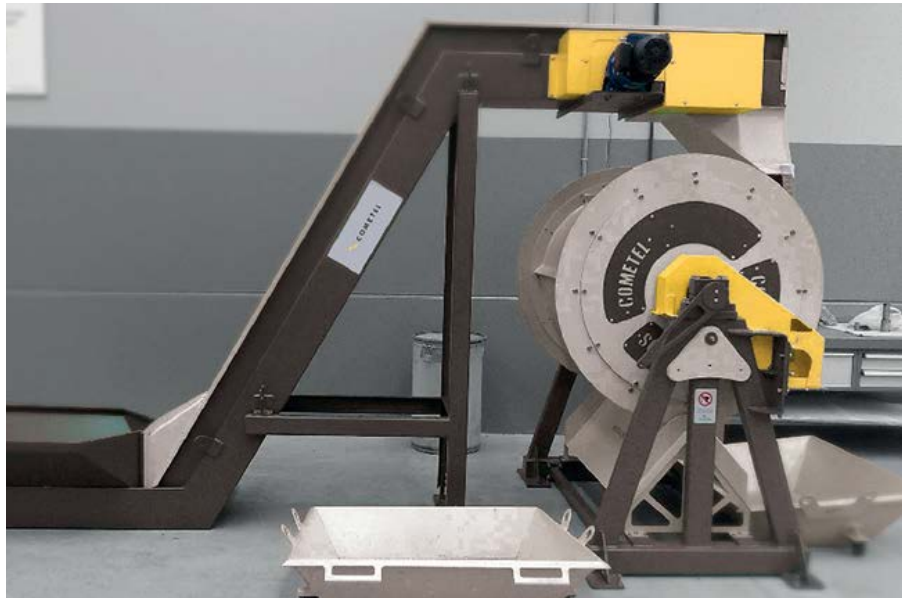

- Continuous separation of ferromagnetic materials.

**CONSISTING OF**

- Stainless steel rotary frame.
- Permanent magnets.
- Paddles for moving the glued material to the non magnetic area.

**PROVIDING**

- Sorting and valuation of the material.
